Applicant further elects for examination that of species six on Table 1 in paragraph 43 of the application, directed to the additive Pentaerythritol Tetrakis (3-[3 ,5-di-tert-butyl-4-hydroxyphenyl]propionate). Applicant notes the Examiner's statement that all claims are generic to all of the species set forth, so that allowance of one of the generic claims noted above in the restriction requirement will entitle Applicant to consideration of claims to additional species.
